## 810      TRAFFIC CONTROL DESIGN GUIDELINES

---

A separate document was developed titled *ADOT Traffic Control Design Guidelines*. This Traffic Control manual is intended to provide information that is ADOT specific, and not included in the MUTCD. It should be used in addition to the MUTCD and not as a stand alone document. It is intended to enhance, amplify, and reinforce the MUTCD and to establish uniform policies for the application of traffic control devices on State of Arizona highways.

Copies of the *ADOT Traffic Control Design Guidelines* are available from the Traffic Engineering Group Web Site  
(<http://www.azdot.gov/highways/Traffic/Standards.asp>).
